

As a diverse coalition of state Attorneys General, charged with defending the rights of our states and their residents and committed to protecting and upholding the rule of law, we **proudly endorse Kamala D. Harris for President of the United States.**

Vice President Harris is an accomplished former state Attorney General and U.S. Senator who has the experience, knowledge, and compassion to lead our nation. She has proven herself to be a powerful leader with a track record at all levels of government of doing what is right for her constituents.

She has spent the past four years as a governing partner to the most experienced President in American history. She has helped pass and implement historic legislation and strengthened our national security through her travels to more than 20 countries and meetings with over 150 world leaders. If elected President, she would enter the office with more national security experience than any recent President other than President Biden.

Not only does her current role equip her to lead our country, but we know firsthand what it means for Vice President Harris to have served as the People's Lawyer for her home state and how that experience has prepared her for the highest office in the land. State Attorneys General stand up for consumers defrauded by swindlers, protect the environment from corporate polluters, and make our communities safer. We are also on the front lines of protecting Americans' rights and freedoms, like the collective work we've done to defend abortion access amid attacks across the country.

Vice President Harris's actions while state Attorney General demonstrate her priorities and commitment to fairness. As Attorney General, Vice President Harris stood up for homeowners harmed by big banks during the foreclosure crisis. She obtained more than a billion dollars in penalties and relief for students fleeced by for-profit colleges. She won millions of dollars in settlements from oil companies that broke laws designed to prevent contamination of soil and groundwater. In short, she prioritized the public interest and the pursuit of justice for all people, just as we know that she will as President.

Vice President Harris offers a vision to the nation that builds on the accomplishments of the past four years and focuses on economic prosperity, justice, public safety, and a dedication to protecting individual rights, including reproductive freedom.

In contrast, Donald Trump offers a bleak vision for our nation, driven by personal grievances and special interests. We have already been down this track. For the four years of Donald Trump's administration, we went to court to stop him from unlawfully curtailing individual rights, stripping health care from tens of millions of Americans, and hurting consumers.

Yet, nothing compares to the danger he posed to our nation when he refused to accept the 2020 election results and engaged in a series of harmful actions to overturn the will of the voters—leading up to the insurrection on January 6, 2021. We know because we were in court protecting the will of the voters and the electoral process.

We need a President with the desire to bring us together, the character and commitment to lead, and the experience and integrity to govern justly. We need a President who will help people, not one who puts

self-interest first, a President who will protect and defend democracy, not one who undermines it. We need Kamala Harris.

We know Kamala Harris. And we know that as a former Attorney General, she has what it takes to win the election and lead our nation.

This year represents an historic choice between a convicted felon and an experienced prosecutor. A choice between someone dedicated to deceit and self-aggrandizement and someone dedicated to honesty and public service. We choose Kamala Harris.

Sincerely,

*Nevada AG Aaron Ford, Co-Chair of the Democratic Attorneys General Association

*Delaware AG Kathy Jennings, Co-Chair of the Democratic Attorneys General Association
